

HealthLink Wellness

HealthLink's basic goal is to create a community based culture of wellness and prevention that links our members not only to the professionals who look after their health but to the social environment in which they live. HealthLink Wellness is a partnership between Rhode Island Alliance for Retired Americans, Inc. Our Lady of Fatima Hospital, Boston University and the New England Association of Labor Retirees. We are bringing together these four organizations devoted to health and community service. That's good news for seniors in our region.

Our Mission:

The mission of the HealthLink Wellness program is to ensure the health and well being of retirees through a program of education and health promotion. It is committed to reduce health risks through health monitoring and feedback and to develop partnerships with practicing physicians that engage the retiree within the fabric of the community. The ultimate goal is to build a culture of prevention where home, community and medical office work together as a team.

Structure:

HealthLink Wellness and its affiliates are non-profit charitable organizations that are dedicated to the needs of the retirement community in New England. They value your support and participation and will keep all information regarding our members strictly confidential. We do not represent any commercial enterprises such insurance plans or managed care programs. Our only link is with you and your physician.

Contact us:

For those who surf the web you can take advantage of communicating with us via E-Mail at: info@newenglandsenior.com or call us at 401-722-7220 to keep up to date with our activities throughout the year:
